Cohort Adjust.																1					1

Percentages below are based on the original cohort at the top of each left-hand column above. USDOE allows the original cohort to be adjusted downward for a number of circumstances; namely, before graduating, if the student dies, enters the militar, enters foreign aid service for the government, or leaves on an official church mission assignment. The number of such students in each cohort above should be recorded in the "Cohort Adjust." box below the column.
