

Financial Aid Disbursement: Method by which Financial Aid will be Disbursed and Frequency

The Financial Aid Office begins issuing Federal Financial Aid to eligible students on the first day of each semester in the traditional program.

The Professional & Graduate Studies Programs funds are issued to the student account approximately three weeks after the start of each semester or later if the student does not begin enrollment until later in the semester. Attendance is verified for two weeks before beginning the disbursement process.

Below are the dates when the Student Financial Services Office begins disbursement of financial aid to be applied to the student account at the school. Please allow 10 business days from the date financial aid disburses for any financial aid refund, after your school bill is paid, to be processed and sent to your personal bank account or legal home permanent address. Be sure to meet and maintain your eligibility during the entire semester. If you do not meet all requirements, it may result in some or all of the aid being cancelled.
